

Job offer: Scientific manager for interdisciplinary units

Description

Cima Universidad de Navarra is a biomedical research Institute of the University of Navarra, located in Pamplona, Spain. Cima's research has a strong translational patient orientation and aims to solve unmet medical needs. Cima's cancer research is integrated into the **Cancer Center Clínica Universidad de Navarra (CCUN)**, a joint initiative of the Clínica Universidad de Navarra (CUN), Cima and the Schools of the Biomedical Area to promote coordinated patient care, research and teaching activities in oncology. We are committed to excellence in research at the forefront of science, with the ultimate goal of bringing breakthrough therapies to oncology patients. To this end, we are establishing Translational Research Collaborative Units (TRAC Units) to foster synergy between preclinical and clinical researchers, and accelerate the translation of laboratory discoveries into innovative cancer therapies. We are seeking a **scientific manager** to ensure the successful operation of these interdisciplinary units.

Functions

- Act as a liaison between preclinical and clinical researchers to promote interdisciplinary collaboration by organizing regular meetings and seeking national and international collaborations and funding opportunities.
- Track progress of interdisciplinary projects, ensuring compliance with institutional and regulatory guidelines.
- Organize seminars, workshops, and other educational and training programs.
- Coordinate internal and external communications.

Requirements

- Education: Ph.D. in biomedical research, preferably with postdoctoral experience in oncology.
- Experience: interdisciplinary collaborations in biomedical research.
- Skills:
 - Strong interest in biomedical research, high motivation and commitment.
 - Strong organizational and social skills.
 - Ability to work independently and creatively.
 - Ability to work in a multidisciplinary highly collaborative research environment.
 - Experience in preparing and executing research grants.
 - Excellent communication skills in both English and Spanish.

What we offer

- The opportunity to play a key role in advancing translational cancer research.
- A dynamic, collaborative environment in one of the leading research centers in Spain.
- Competitive salary with an initial full-time contract duration of 2 years (which can be extended for a further 2 years).

How to apply

Interested candidates should submit their CV and motivation letter through this [website](#), including three names and email addresses for letters of recommendation.
